

The Same But Different!

The Narrow Loop Chain Feeder Made Just For Your Male Birds

The Narrow Loop Chain Feeder from VAL-CO® provides uniform feed distribution for your male birds. The unique grill prevents males from eating from inside the loop, encouraging them to eat from the outside of the system so they can be easily inspected and evaluated.

Design Features:

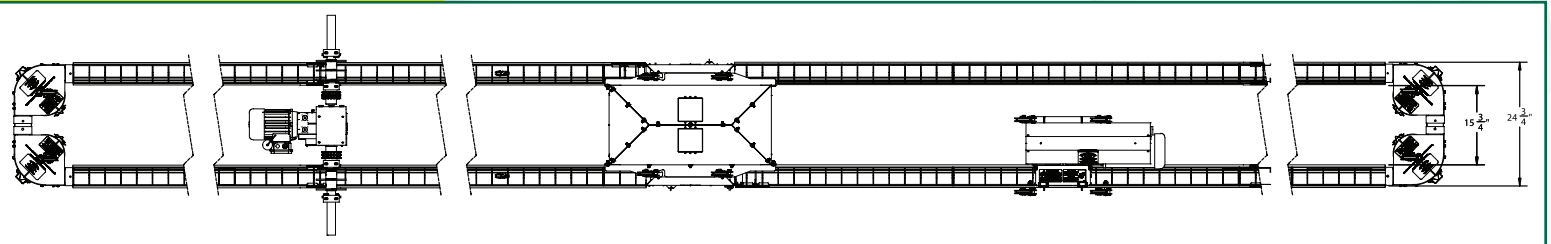

- At only 24" wide, it will not take up a lot of space in your house
- The new hopper can send feed in both directions at the same time
- The new extension hopper can hold up to 350 lbs. of feed with knockouts on the top for easy access
- One winch lifts the entire system up in the air at night, enabling the trough to be filled, then lowered in the morning for presentation feeding
- Uses the same VAL-CO corners, chain, trough & direct drive units as our hen feeders, ensuring that farmers and dealers have less parts to keep on the shelf

One winch lifts the entire system!
