

# NEW PRODUCT RELEASE

## VAL-CO Now Offering the Fortica® Whole House Controller to the U.S. Cage-free Market

VAL-CO® is excited to announce its cooperation with Hotraco Agri to bring the powerful Fortica Whole House Controller to the U.S. poultry market.

The Fortica Control is a universal poultry automation system that gives users total control over all house processes, including feeding, watering, lighting, animal weighing, and egg counting.

The fully intuitive touchscreen control is customizable to meet user preferences. It shows a 3D overview of the barn and works seamlessly with the latest generation of Variable Speed V-Fans to maximize energy savings. Fortica can also tie in to existing BinTRAC silo weighing systems.

Best of all, users can remotely control the Fortica with their phone, tablet, or PC through the SyslinQ App. This capability means you can always ensure the best environment for the birds, even if you can't be at the farm.

To make record keeping a breeze, Novus Farm Management software visualizes all relevant house data in charts and diagrams on your PC so that users can easily monitor and compare animal weights, egg production, house climate, and feed and water intake for all houses.

Everything you need for cage-free egg production in one seamless control.
